

Ending violence against women and girls in Georgia (EVAWGG)

Duration: 01.11.2020 - 31.10.2023

Countries:
Georgia

EU contribution: € 1 500 000

Implementer:

United Nations Entity for Gender Equality and Empowerment of Women

**Funded by the
European Union**

Project description:

In the proposed action, UN Women and UNFPA will work with duty-bearers at the highest possible level as well as with women's rights defenders and CSOs at the grass-roots level. The primary focus of the action, along with the further strengthening of existing support services, will be the development of a socioeconomic rehabilitation programme for the victims/survivors, learning from and adapting relevant EU best practices. Civil society partners will be engaged by the action especially in the field of awareness-raising to increase VAWG/DV reporting as well as the transformation of the social norms and stereotypes that condone gender-based violence.

Expected results:

Result 1: Legislation, policies and institutional capacities are in place to effectively prevent and respond to violence against women and girls, including domestic violence.

Result 2: Awareness-raising and mobilization of communities and institutions on gender equality, women's rights and zero tolerance for violence against women (with special focus on men and boys) results in more respectful relationships and the transformation of the negative gender stereotypes, social norms and attitudes that condone such harmful practices and violence
