Expertise France, Finnish Institute for Health and Welfare

**Website(s):** [www.ncdc.ge](http://www.ncdc.ge) ; [expertisefrance.fr/en/fiche-projet?id=861905](http://expertisefrance.fr/en/fiche-projet?id=861905)

### Project description:

The overall objective of the project is to provide assistance to Georgian institutions in the implementation of Health-related obligations of the Association Agreement to foster health in all sectors approach. The specific objective of the project is to strengthen the National Center for Disease Control (NCDC) and relevant stakeholders' institutional capacity for integrating health aspects in the Health Impact Assessment (HIA) evidence-based decision making.

### Expected results:

Georgian Public Health legal and regulatory framework revised in line with the provisions of the relevant Annexes of the Association Agreement (AA) as well as taking into account Georgia's commitments towards Multilateral Environmental Agreements and other relevant international pledges;  
Institutional Capacity to Conduct Health Impact Assessment of the environmental health risks under the LELP national Center for Disease Control and public health strengthened ;  
The capacity of relevant state authorities and other key stakeholders to ensure reliable and quality data management;  
A well organized and coordinated public involvement;
