

Improving Infrastructure Quality through Better Planning Systems

Duration: 03.01.2018 - 10.02.2019

Countries:
Georgia

EU contribution: € 1 500 000

Implementer:
RZECZPOSPOLITA POLSKA

Website(s): mrdi.gov.ge/

Project description:

Enhancing capacities of the Georgian administration at national and local level in identification and preparation of infrastructural projects aiming at expanding investment opportunities for SMEs and assuring balanced development of the Georgian territory.

The project will support transferring of the EU best practice to the relevant Georgian authorities at all levels (national and local) regarding the legislation in the field of spatial planning, including preparation of spatial development plans for selected local authorities and enhancing skills of local authorities in identification and preparation of investment portfolios and projects aiming at infrastructural development.

Expected results:

- Drafting the Spatial Development and Land Use Plans for 2 selected municipalities;
- Preparation of guideline for development, drafting and adoption methodologies of spatial and land use plans elaborated for the state and the regional/municipal authorities, according to the EU / EU Member States best practice;
- Sharing the EU MS(s) best practice on development of the investment project portfolio;
- Preparation of guideline for drafting multi annual investment project portfolios.
