Project description:

The main objective of the project is improved protection of the environment and health of the population in Georgia.

The should be obtained through:

1. Promote waste prevention and minimisation concepts (sorting/recycling/reuse of wastes) to improve waste management practices.
2. Support the introduction of the concept of "Green"/Circular Economy in the society and the economic activities.

Expected results:

Increased capacities of public and private sectors in transition to Circular Economy through clearly defined pertinent policy, regulatory framework and best practices.
