

Chokhatauri Municipality Towards a Sustainable Energy Future

Duration: 01.01.2023 - 30.06.2025

Countries:
Georgia

EU contribution: € 720 117

Total budget: € 772 117

Implementer:
Local self-government (LSG) in Chokhatauri

Project description:

The project aims to improve the local ecosystem for an increased share of renewable energy sources (RES) and energy efficient (EE) packages to be used by the local self-government, private sector and civil society organizations (CSOs) in Chokhatauri municipality.

The project is based on two priorities: improvement of the local infrastructure and services of the LSG in order to enhance the residential comfort level and investment attractiveness of Chokhatauri and promotion of the public participation, inclusive decision-making and consultative processes to achieve higher quality and accountability of the municipal services.

Expected results:

- (1) Improved infrastructure in seven kindergartens following energy-efficiency standards prove to the residents that LSG cares about young generations and undertakes actions to prevent emigration at the very early stage;
- (2) Annual local budget savings because of energy efficiency improvements enables LSG to meet the local needs better;
- (3) Fostered public participation and energy-efficiency across sectors creates conditions for open local governance and service-based municipal services;
- (4) Savings re-investment mechanism ensures the sustainability of the results beyond the project lifetime and multiplication potential for other low-income LSGs in Georgia.
