European Union**

Project description:

The project "Strengthening Human Capital Development in Georgia" aims to support further advancement and effective management of the social protection system.

The project, implemented by the French Development Agency (AFD) and Expertise France and with the generous support of the European Union, was launched in 2024 and will run for 4 years.

The main objective of the project is to strengthen primary health care, improve coordination between primary and hospital care with a focus on mental health, develop better social and employment services for those in need, and promote efficiency, transparency, and accountability of public administration through digital systems. The additional transversal aim of the project is to strengthen gender sensitivity in all supported activities.

The main final beneficiaries of the project are professionals, children, vulnerable populations, such as people with disabilities, the elderly, low-income families, unemployed individuals, jobseekers and others who are in need of social assistance, mental healthcare services etc.

Expected results:

The main expected results of the project are:

- Better social protection system in Georgia;
- Improved social and employment services delivery to vulnerable groups, with a focus on people with disabilities and a gender approach;
- Better Primary Health Care Services, with a focus on mental health and with a gender sensitive approach;
- Improved information security and operation management;
- Upgraded IT infrastructure;
- Increased availability of effective tools for monitoring and preventing cyber incidents;
- Increased efficiency, transparency, and accountability of public administration.
