

Initiating anITa - Digital Teaching Assistant

Duration: 16.07.2024 - 31.10.2025

Countries:
Georgia

EU contribution: € 500 000

Total budget: € 500 000

Implementer:
Georgia's Innovation and Technology Agency (GITA)

Website(s): doit.gov.ge

Project description:

AnITa is an innovative Interactive Teaching Assistant designed to transform education by integrating advanced digital skills modules into a dynamic learning experience. Tailored to diverse learning styles and interests, AnITa provides personalised learning roadmaps, interactive modules, and project-based activities that promote hands-on exploration and deep understanding of digital concepts. The programme includes virtual laboratories, peer collaboration opportunities, and career exploration resources, equipping students with essential IT skills while inspiring them to pursue careers in technology.

Expected results:

- 1) Increased student engagement and success in mastering advanced digital skills.
- 2) Enhanced career readiness in IT fields, especially among female students from underserved regions.
- 3) A more inclusive and diverse participation in tech-related education and careers.
- 4) Development of essential problem-solving and collaboration skills through project-based learning.

**Funded by the
European Union**
