

Human Rights for All – Realization of Child Rights to Family, Justice, and Adequate Standard of Living

Duration: 30.10.2024 - 29.10.2027

Countries:
Georgia

EU contribution: € 2 500 000

Total budget: € 2 697 168

Implementer:
UNICEF

Website(s): No specific website. UNICEF digital platforms will be used

Project description:

The project aims to support children's right to a family environment by enhancing prevention and reintegration services. This involves assessing current reintegration processes, identifying family needs, and designing support programs to increase the number of children returning to their biological families.

This initiative focuses on enhancing the Centre for Victims of Sexual Violence (Barnahus) which serves children who have experienced sexual violence and require immediate support and rehabilitation. One of the most effective strategies to prevent sexual violence is to empower children, parents, and caregivers by raising their awareness of the issue and strengthening their ability to respond to and report cases of violence. Finally, the plans also include raising awareness about children's rights through a nationwide campaign.

Expected results:

1. Capacity of professionals involved in prevention of family separation and reintegration is reinforced and multidisciplinary cooperation strengthened
2. Capacity of professionals is enhanced to foster early identification of child vulnerabilities and development of inclusive social services through evidence-based approaches
3. Children and youth have capacity and platforms for meaningful participation in municipal decision making regarding social programmes and services
4. Strengthening multidisciplinary support for child victims of sexual abuse and enhance access to child-friendly legal aid for children in contact with the law
5. Children are empowered to access child-friendly justice and protection mechanisms
