Project description:

The aim of the project is to provide support and necessary services for vulnerable mothers and children of Akhmeta and its surroundings through improvement of their health care, education and development opportunities. Project offers psycho-social support and after school programmes to mothers and children with disabilities and to those living in extreme poverty.

Expected results:

- Strengthened and diversified capacities of the community based organizations for supporting local community development
- Improved life for communities and decreased risks of the extended vulnerability of next generations.
- Increased education, health and development opportunities for vulnerable women and children.
