

EU4DigitalUA: interoperability, e-services and cybersecurity

Period of implementation: 01.10.2020 - 31.03.2024

EaP countries:
Ukraine

EU contribution: € 9 599 900

Implementing organisation(s):
e-Governance Academy

Website(s): eu4digitalua.eu

Project description:

The project's digital components are focused on the development of digital government infrastructure, modernisation of public e-services, and further development of cybersecurity and data protection capacities in close collaboration with the Ministry of Digital Transformation of Ukraine.

Social media:

facebook.com/EU4DigitalUA, <https://twitter.com/Eu4Ua>

Expected results:

- > Sustainable environment for the development of e-services is created.
- > Key state registers interact with each other and provide the automated information exchange (interoperability) needed for e-services provision.
- > Trust in governmental e-services increased through the creation of a secure infrastructure: ecosystem for digital identification, secure data exchange, data quality in key state registers, etc.
- > Key stakeholders developed the necessary capacities to effectively steer and coordinate the design and implementation of the e-governance policy.
- > The civil and private sector is well informed about the opportunities and risks of e-governance.
- > The government institutions have an improved capacity to tackle cyber threats and implement data protection principles.
