პროექტის აღწერა:

The goal of the current Twinning Project is to strengthen the institutional capacity at the Government of Azerbaijan in the Mandatory Health Insurance (MHI) field and assure tangible gains in accessibility and quality of health care, and reduce of out of pocket payments and related poverty. The goal is also to ,to grow the productivity of health care resources in line with the Eastern Partnership (EaP) objectives and agendas of the World Health Organization (WHO), which is dedicated to strengthening health systems and finding sustainable solutions to increase their resilience and assure universal health coverage for the whole population, as well as, develop capacities to measure and monitor quality, availability, price and use of healthcare services and products. More specifically, the project aims to build capacities and provide advisory assistance to the related beneficiary institution through activities structured to work in four directions: Result 1 activities aim to improve the legal framework, and institutional capacity of Azerbaijani Governmental institutions on national and regional levels. Result 2 activities aim to improve the capacity and address the needs of State Agency on Mandatory Health Insurance of Azerbaijan (SAMHI) in such fields as risk management, financial and medical audits, monitoring, and evaluation. Result 3 activities aim to improve the forecasting and planning capacity of SAMHI, which are important prerequisites for a well-functioning MHI scheme. Result 4 activities aim to facilitate the improvement of digitalization process of SAMHI system, thus contributing to the overall digital transformation of the country.
