Project description:
The "EU4Dialogue: Supporting Understanding Between Conflict Parties" is the first component of a larger EU4Dialogue Programme. This project aims to establish an environment conducive to defusing tension, encouraging dialogue and fostering better understanding across the divides in the South Caucasus and the Republic of Moldova.

The purpose of this project is to provide the EU and relevant actors in the South Caucasus and the Republic of Moldova with technical assistance, as well as to foster synergies with and between the different actions.

Expected results:
The main results to be achieved by the "EU4Dialogue: Supporting Understanding Between Conflict Parties" project are:

- Multi-level dialogue platforms including meetings and workshops on cross-regional level reinforcing people-to-people contacts across dividing lines.
- Capacity building activities fostering exchange and networking between relevant stakeholders within the countries, cross-country, and with EU-peers. The capacity building will be needs based and planned based on consultations.
- Awareness raising and understanding of EU policy support and outreach that reinforces understanding of the benefits of peace and dialogue.
