

A Green and Healthy Future for Georgia

Where do we start from?

Relevant SDGs What do we want to achieve?

How do we want to do it?1

Environmental requirements of the EU-Georgia Association Agreement.

Government passed several laws to help environment (Environmental Assessment Code, Law on Environmental Liability, Forest Code, Law on Biodiversity).

Significant work done by Team Europe and partners to support green transition in Georgia.

Forests and biodiversity are protected.

- → Improved natural resource management
- → Enhanced biodiversity conservation and law enforcement

Waste management services for citizens are improved

- ightarrow New or upgraded waste collection systems are established
- → Municipal Waste Management plans are developed
- → Extended Producer Responsibility (EPR) principle is implemented
- $\xrightarrow{}$ New EU-standard landfills are planned and implemented

Urban dwellers enjoy green municipalities:

- → Reduced pollution in urban areas
- → Increased awareness of green issues and health impact
- → Lower emissions from transport
- → More opportunities for SMEs thanks to green transition
- → Enhanced urban water and sanitation services
- → Energy efficiency in public buildings

Policy dialogue

Budget support

Technical Assistance

Grants

Institution Building (Twinning and TAIEX)

Investments and guarantees (NIP and EFSD+)

Transformational potential

Building a green and healthy future for the communities of Georgia
